Kentucky Bluegrass

- 100% Kentucky Bluegrass
- Recommended for sports fields, golf courses, and other high traffic areas
- Excellent ability to repair itself
- Higher maintenance—requires more water and fertilizer
- Requires full sun; little to no shade tolerance
- Cool-season grass; medium to low heat tolerance
- Medium-fine texture
- Spreads easily by rhizomes

Microclover/Black Beauty Blend

- Black Beauty Tall Fescue combined with non-colonizing, non-flowering Microclover (this is not the invasive Dutch white clover typically found as a weed in lawns)
- Microclover absorbs nitrogen from the atmosphere to naturally fertilize the turfgrass; fertilizer is not needed
- Sustainable option; great for conservation areas
- Minimal water required once established
- No need for fungicides or herbicides
- Drought and shade tolerant
