

Add color and texture to your lawn and landscape with native sods. Use ferns, berries, and moss as border plants, rock wall and stairwell accents, or make it the main attraction. Many native sods also work well for erosion control on slopes.

Most native sod is sold by the square foot and each piece measures approximately 16" x 24". However, some ferns are sold by the clump as noted in the descriptions below. Ferns sold by the clump should be planted with space between them, approximately 1 to 2 feet apart, allowing room for them to spread. Calculate one clump for every 2 square feet. Actual size of the clumps will vary.

Minimum orders apply. We may be able to reduce the minimum if multiple varieties are being ordered for delivery at the same time. Delivery is additional, not included in prices below. **Please contact us for a quote on any high volume orders.** Prepayment is required and native sod orders may not be cancelled, changed, or refunded once harvesting has begun.

Blueberry | *Vaccinium angustifolium*
up to 200 sq ft per pallet | Min. order 200 sq ft*

\$8.50/sq ft

Maine's famous lowbush wild blueberries! An antioxidant super fruit with four season beauty. In addition to tasty berries, you get perky pink to white bell shaped flowers in May, blazing scarlet color in fall, and red twigs all winter. Full sun and acidic, well-drained soil is preferred. Will need maintenance. Zones 3-7.

Hay-Scented Fern | *Dennstaedtia punctilobula*
up to 350 sq ft per pallet | Min. order 200 sq ft*

\$8.50/sq ft

A perfect plant to prevent erosion, hay-scented fern is a tough, fast spreading, lacy fern that adapts to drier soil or damp soil. Finely textured, it has a spring green color. It's a medium grower to about 15" and is from the bracken fern family. The crushed fronds actually do have the scent of fresh hay! The golden fall color is a bonus. Zones 3-8.

Huckleberry | *Gaylussacia baccata*
up to 200 sq ft per pallet | Min. order 200 sq ft*

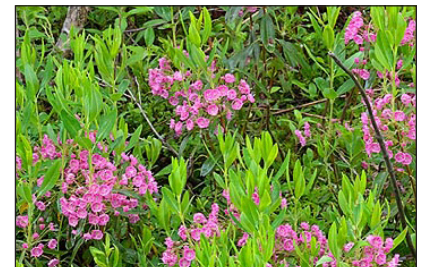

\$12.50/sq ft

A deciduous shrub often found in dry areas. Grows to about 1-3 feet high. Huckleberry is a great ground cover for thin, rocky woods. White to pink flowers blossom in spring, deep black-purple berries arrive in summer, and the fall display ranges from orange to crimson. Partial shade to full sun; wet, moist, or dry soils. Zones 5-9.

Sheep Laurel | *Kalmia angustifolia*
up to 200 sq ft per pallet | Min. order 200 sq ft*

\$8.50/sq ft

This compact, evergreen shrub thrives in moist, acidic soil and part shade. Size varies from 1-3 feet tall. A relative of rhododendrons and azaleas, it bears narrow, leathery leaves and clusters of deep pink flowers bloom early to mid-summer. Attracts bees and songbirds. Keep away from livestock due to toxicity. Zones 1-7.

Interrupted Fern | *Osmunda claytoniana*
up to 150 clumps per pallet | Min. order 150 clumps*

\$8.50/clump

This fern gets its name from the spore bearing leaflets that interrupt the broad fronds. Grows in a spreading vase form 2-3 feet tall, and up to 5 feet tall with constant moisture. It's deer resistant and performs best in full shade, but can tolerate sun if the roots stay moist. Perfect for wet areas of the landscape. Zones 2-8.

Christmas Fern | *Polystichum acrostichoides*
up to 150 clumps per pallet | Min. order 150 clumps*

\$8.50/clump

The leathery, lance-shaped fronds of Christmas fern mature to a glossy green that remains all winter until leaves are shed the following spring. Grows in a tidy, fountain-like shape. As with most ferns, it prefers shade to partial sun. Typically grows 1.5 to 2 feet tall, but may occasionally reach 3 feet tall with optimal conditions. Zones 4-9.

Cinnamon Fern | *Osmundastrum cinnamomeum*
up to 150 clumps per pallet | Min. order 150 clumps*

\$8.50/clump

Eye-catching and easily recognized, this big, bold fern can grow up to 3 feet tall. The unfurling fronds and stems have an appealing, rich, wooly coating as they emerge in the spring. They grow in moist woodland, bogs, peatlands, thickets, swamps, ditches, and along stream banks. Prefers moderate shade. Zones 1-11. Sold in clumps.

Ostrich Fern | *Matteuccia struthiopteris*
up to 150 clumps per pallet | Min. order 150 clumps*

\$9.50/clump

An elegant, symmetrical fern with ostrich feather-like fronds, this vase-shaped fern has broad fronds near the tips and tapers back down to the crown. Plant in filtered sun to full shade. Since this fern likes moist, shaded areas, it's great near wet areas of your landscape. Zones 3-7. Sold in clumps.

New York Fern | *Thelypteris noveboracensis*
up to 250 sq ft per pallet | Min. order 200 sq ft*

\$8.50/sq ft

Native throughout the eastern United States except Florida, New York Fern produces finely textured fronds that are narrow at both ends, making it easy to identify. Spreads quickly in moist locations with dappled to full shade. Yellow-green foliage becomes a lovely golden color in autumn. Zones 3-8. Sold in clumps.

Clubmoss | *Lycopodium clavatum*
up to 200 sq ft per pallet | Min. order 200 sq ft*

\$10.75/sq ft

Also known as common clubmoss, stag's horn clubmoss, or running clubmoss, this ground cover grows abundantly throughout the New England states. Because of its resemblance to pine, it's often used to make holiday decorations. In late summer to fall, this vascular plant bears spore cones on stems from 2 to 5 inches tall. Zones 2-8.

Bunchberry | *Cornus canadensis* or *Chamaepericlymenum canadensis*
up to 200 sq ft per pallet | Min. order 200 sq ft*

\$12.50/sq ft

This exquisite ground cover grows to 3 inches tall and slowly spreads. 2-inch whorled leaves, dark green and shiny in summer, become wine-red in the fall. Charming 4-point white flowers from late spring to summer, scarlet berries in the fall. Partial sun/moderate shade, moist soil preferred. Zones 2-6. **Limited supply.**

Other Native Sodds Available (Limited Supply)
